## Updating our asset classes to reflect the breadth of the ICG platform

ICG announces today that it is updating its asset classes for the purposes of financial reporting.

The new reporting structure more accurately reflects the business and operations of ICG today.

The reorganised asset classes within the Fund Management Company will be Structured and Private Equity; Private Debt; Real Assets; and Credit:

- Structured and Private Equity (\$18bn third-party AUM<sup>1</sup>): providing structured and equity financing solutions to private companies;
- Private Debt (\$19bn third-party AUM<sup>1</sup>): providing debt financing to high-quality corporate borrowers;
- Real Assets (\$6bn third-party AUM<sup>1</sup>): providing financing solutions in the real estate and infrastructure sectors; and
- Credit (\$18bn third-party AUM<sup>1</sup>): investing in primary and secondary credit markets.

More information, including historical reconciliations, is available in the information pack on our website at [Results Centre FY2022 \(icgam.com\)](#).

This change has no impact on our consolidated IFRS results, or on the calculations or definitions of our alternative performance measures (“APM”). ICG will continue to report the Fund Management Company and Investment Company segments separately within the APM reporting.
